### What is Human Trafficking?

## BASIC STAGES OF GROOMING

Grooming is the process of preparing or training someone for a specific purpose, sex or labor trafficking

**TARGETING A VICTIM**  
Traffickers target victims who have some noticeable vulnerability: emotional neediness, low self-confidence or economic stress.

**GAINING TRUST & INFORMATION**  
Obtaining information about the victim is key. This can be done through texting, online dating apps, or casual conversations with the victim.

**FILLING A NEED**  
The information gained allows the trafficker to fill a need in the victim's life, making the victim dependent on them in some way. This can be done through buying gifts, offering a job, providing housing, beginning a love relationship, or buying drugs and alcohol.

**ABUSE BEGINS**  
The trafficker begins to claim that the services, gifts, or debt must be repaid. In sex trafficking cases, the trafficker demands the victim work in the commercial sex industry to repay debt. In labor trafficking cases, the trafficker creates toxic working conditions for the victim.

**MAINTAIN CONTROL**  
The trafficker maintains control of the victim through threats, violence, fear, or blackmail.
